
Mauna Loa Solar Observatory Observer's Log

Sat Apr 12 16:39:40 GMT 2003

Year: 03 Doy: 102

Observer: stueben

WEATHER COMMENT: Sat Apr 12 16:41:59 GMT 2003

Mostly overcast, cirrostratus above darker lower clouds, wind calm, temp 43F.

Satellite photo looks ugly. Leaving domes closed at present.

WEATHER COMMENT: Sat Apr 12 19:05:56 GMT 2003

Still overcast, occasional snowflakes.

WEATHER COMMENT: Sat Apr 12 20:18:07 GMT 2003

The darkest, most threatening clouds have cleared, so I have opened the domes in hopes of further clearing, but cloud cover is still too dense to point the spar.

WEATHER COMMENT: Sat Apr 12 22:13:04 GMT 2003

Rain/hail, domes closed again.

Sun Apr 13 01:31:51 GMT 2003 MKIV Start Patrol

WEATHER COMMENT: Sun Apr 13 01:33:25 GMT 2003

Still raining. I have run several scans on Mk4 for testing(dome closed), but have not taken any good data today.
