PSPT PROBLEM Sat May 24 20:33:36 GMT 2003

Crashed at 19:10 with error messages as follows -

% Attempted to extend common block: PSPT_CALOFF At: pspt_calib_data.pro Line 752

% Attempt to call undefined procedure/function: 'PSPT_CALIB_DATA'.

% Execution halted at: PSPT_DAILY_OBS_EVENT 197 pspt_daily_obs.pro

I killed the process and restarted. On restart the dome rotation stalled moving away from the home position. The motor continued running, bouncing up and down as gear teeth skipped. Since dome position was now bad I ran shutdown and then tried startup again - this time the dome moved without stalling. Shortly after

starting daily obs the program crashed again with the same error messages. Killed and restarted again - it is now running OK.
