WEATHER COMMENT: Fri Jul 23 16:37:37 GMT 2004

Clear sky, no wind, temp=45 F.

ECHO COMMENT: Fri Jul 23 17:03:45 GMT 2004

Time OK.

Fri Jul 23 17:38:20 GMT 2004 PICS Start Patrol

****PICS PROBLEM****: Fri Jul 23 17:22:51 GMT 2004

Still having those new problems that appear to have started on 7/21, 2 days ago. GUI shows Program: sync...22.52 - which means it won't take data until 1752 most likely. I found the Mike controller for PICS in Local mode with the Run command active for M1, we don't use this controller in normal obs so I put it into Remote mode and restarted Patrol with Kill/Run cycle to see what happens, this will at least help prevent problems caused by pressing the buttons while in the Local enabled mode.

PSPT COMMENT: Fri Jul 23 17:56:48 GMT 2004

Observing.

MKIV COMMENT: Fri Jul 23 17:58:54 GMT 2004

Centered occulting.

****PICS PROBLEM****: Fri Jul 23 19:16:27 GMT 2004

David called and we discussed the problem and watched the Status display. He thinks the Boulder.asf and Boulder.alr routines are taking too long and causing timing problems, he'll send email about it to those who have worked on the software so that the routines can be fixed. He and Kim won't be coming out next month as planned due to other scheduling conflicts.

COMMENT: Fri Jul 23 20:03:49 GMT 2004

Extended dome slot a few minutes ago.

Fri Jul 23 20:10:24 GMT 2004 PICS Start Patrol

PICS PROBLEM Fri Jul 23 20:07:02 GMT 2004

Alice modified the software and asked me to do a Kill/Run cycle, that is done and so far it is running well.

WEATHER COMMENT: Fri Jul 23 20:19:40 GMT 2004

Thick dark clouds have moved in, looks like it will rain, closing down.
