PSPT COMMENT: Tue Dec 21 19:22:46 GMT 2004

Removed the block at filter position -200, point to position -6200 to access it from the hatch. Attached ND filter to wide bandpass CaK filter we received yesterday, and installed washers to give the same tilt to ND as with the regular wide bandpass CaK filter ND prefilter, installed new filter and ND prefilter into position -200 on filter wheel.

CHIP COMMENT: Tue Dec 21 20:16:48 GMT 2004

The Abort command didn't pause the instrument apparently, started up Monitor task and used End from the resulting window to pause instrument.
