PICS PROBLEM : Sat Jan 8 02:23:46 GMT 2005
Appears that from 0153 UT, the halphadisk command is having problems
with the occulting wheel (most probably) syncing with the camera.
I think I saw this in the form of dark images at the end of the day
on Wednesday, 1/5. Today, there are images with the cal wheel partially
in and other strange images that appear to have some filter (Halle?) partially
in or out of the optical path.
