WEATHER COMMENT: Thu Jan 13 19:00:51 GMT 2005

What a snow! It started on Sunday and lasted at least till Monday, then the road was too icy to get up here within maybe 3 miles or so, there was a crust of ice making it too slippery. Today the crust is gone and the tires sunk in enough to get traction all the way up to the new clamshell tent dome corner, after that the tires sunk in too far - and it didn't help that someone put a pile of snow right over the road area, it looks like they made a sled run above it. Wind=30 mph from the West, temp= 36F, clear sky.
