Scattered cirrus passing over.

\*\*GONG PROBLEM\*\* : Sun Apr 3 19:38:53 GMT 2005

Back from shelter. The date and times were question marks in the GUI, like last Sunday, but this crash was different because the red Fault LEDs on the DAS modules weren't lit this time, the green LEDs weren't blinking though. Cycled power to Data and Instrument chassis twice before it continued taking and displaying data properly, it looks normal now.
