**PICS PROBLEM**: Thu May 12 17:36:11 GMT 2005
PICS won't run. Nene stalls when it starts taking images. File system problem?
probably related to yesterdays kaiee problems.

PICS still won't run. I've talked to Bunny and she thinks its a hardware memory
problem and suggests powering down Nene and reseating the memory modules. I'll do that today as time allows.

**PICS PROBLEM**: Thu May 12 20:53:05 GMT 2005
I've powered down nene and swapped the positions of the two memory modules. The
problem persists. It boots OK with no error messages on the screen but when I
start patrol it hangs at the first image during "Accumulate: 0>0". If a bad memory module is the cause then we'll need to
have a new one/set sent. I've emailed
Bunny and Vic. Failing any other suggested solutions PICS is down until we get
a new memory module.

**GONG PROBLEM**: Thu May 12 21:00:57 GMT 2005
Gong has been crashed again for a while. I've been busy with Nene and haven't
tried restarting it again, I'll go down to the shelter shortly.
