COMMENT: Thu Jun 30 01:44:04 GMT 2005

Finished screwing the top edge of the dome cylinder sheathing between the north end of the doghouse to the southeast "corner" of the dome. Scraped loose paint chips off the dome cylinder's west window while up the ladder. East cylinder wall and north east section over the control room roof still needs to be screwed in. High windows on east need scraping while on ladder.
