\*\*MLSO PROBLEM\*\*: Sun Apr 16 17:28:14 GMT 2006

We've been getting messages since the 14th saying that Kenobi is getting full, now it is full, I can't run PICS or CHIP due to messages saying there is

"no space left on device". The email messages we got say that the proper people in Boulder have been notified, yet Kenobi still filled up for some reason.

I'll try to get data with mk4 and PSPT since those data can be held for several days on workstations other than Kenobi. I can see "mv" error message on PSPT due to Kenobi being full too.

\*\*MKIV PROBLEM\*\*: Sun Apr 16 17:45:38 GMT 2006

Not getting the timelapse animation, I see data in the proper directory but no .gif files so no animation, I'll keep it running anyway in hopes that data are usable.
