MKIV PROBLEM: Sat Jul 29 17:20:03 GMT 2006

At startup - no CW (or CCW) pulses at signal transformation board, barrel status shows CW limit, barrel angle display shows 359+ deg (-.02 deg on monitor), CW Limit scrolling in akamai window. Switching to the control screen and selecting CCW motion stops CW Limit and CW Limit status LED goes out, but no pulses show and barrel angle display does not change.

About 1715UT I notice barrel moving, CCW pulses show on signal transformation board.

Mk4 is now running normally - the joy of troubleshooting intermittently operating systems is that you can't do much troubleshooting when they are working.
