PSPT PROBLEM: Fri Dec 8 18:19:27 GMT 2006

No image, pspt not pointed correctly at sun. Centering.

____end____

PSPT PROBLEM: Fri Dec 8 18:21:49 GMT 2006

Had to manually point spar before centering routine acquired sun.

RA clutch may be too loose after yesterday's adjustment to compensate for wind buffeting and gust, this morning, may have blown spar off pointing.

____end____

PSPT PROBLEM: Fri Dec 8 18:27:38 GMT 2006

Centering program kept iterating, could see spar bouncing around.

Aborted centering and restarted observations. We'll just need to live with the bounce while gusty wind blows into the dome slot.

____end____
