****SBM PROBLEM****: Sun Apr 22 17:43:07 GMT 2007

Found cause of startup problem, SBM hasn't been run for several days because it won't startup to a windows environment upon reboot. Problem was that /dev/hda2 was 100% full, temporary solution was to delete the oldest data in the /archive directory, then the proper GUI appeared upon reboot and login. Taking data again. More old data will have to be deleted or problem will recur.
