**CHIP PROBLEM**: Sun Jan 20 20:51:30 GMT 2008
Checked out Kodak camera controller and found a blown fuse in the AC
filter/switch unit.  Temporarily replaced the 250V 1.25A fuse with a 1A
fuse that we had in our spares (these are the small GMA-type fuses).  Got
the controller to turn on.  Put it back on CHIP and fired up Patrol.
```

Program still stalled at "exposures" and "ps" indicates program is still
waiting for Camera. Problem still exists further in the Camera controller
circuit. CHIP still down.

MLSO PROBLEM: Sun Jan 20 23:39:43 GMT 2008
Replaced suspect power strips. Need to tidy things up at a later time.
CHIP hasn't come up after the swaps. I will check that out tomorrow
since CHIP is out of service anyway.
