\*\*GONG PROBLEM\*\* : Tue Dec 9 19:09:07 GMT 2008

Network connection problem again. The spare hub I swapped in may have only lasted one day, it was OK yesterday, but it was an old hub and may be flaky. The problem looks the same as what I saw on Sunday, I fixed that with a spare hub but now we don't have any spares. GONG is sending us a new hub, we'll see how that works. Data are being gathered as usual, but we can't check status from up here until the network works again.

WEATHER COMMENT: Tue Dec 9 22:50:32 GMT 2008

Getting some altocumulus clouds now, still have cirrostratus also.

\_\_\_\_end\_\_\_\_

WEATHER COMMENT: Tue Dec 9 23:53:03 GMT 2008

Now vog and low clouds are moving in.
