
Mauna Loa Solar Observatory Observer's Log

Thu Dec 11 17:23:58 GMT 2008

Year: 08 Doy: 346

Observer: koon

WEATHER COMMENT: Thu Dec 11 17:23:59 GMT 2008

Thick cirrostratus overcast, low clouds capping Mauna Kea and Mauna Loa, wind=5mph from the South, temp=44F, flash flooding on Oahu right now.

GONG PROBLEM: Thu Dec 11 17:53:07 GMT 2008

Tried out terminal in MLSO and it is communicating with the shelter, so the network is working again. I went to the shelter and found the same old hub in place but functioning correctly. When we get the new hub I think we should swap out this old hub and keep it as a flaky spare.

MLSO PROBLEM: Thu Dec 11 20:57:38 GMT 2008

There appears to be an email problem. I got messages from today and yesterday and even a reply to a message I sent this morning, but now if I send a message to koon@ucar.edu I don't receive it.

WEATHER COMMENT: Thu Dec 11 22:20:59 GMT 2008

Lots of low dark clouds, domes are closed.

____end____

MLSO PROBLEM: Thu Dec 11 22:22:42 GMT 2008

Finally got my test messages I sent to koon@ucar.edu back around 2030 UT, maybe email is functional again. Earlier I could send out messages but couldn't receive any, problem appears to have been on the Boulder side.
