GONG PROBLEM: Fri Apr 24 18:38:03 GMT 2009

Just got back from shelter, fixed a network problem, the media converter has a flaky switch. I will request that they send us a spare, last time I requested one they said it wasn't a "spared" type part, but they'll need to send one if they want good network connection. Also stowed and covered the instrument turret due to snow.

GONG PROBLEM: Fri Apr 24 20:58:24 GMT 2009

Just got back from shelter, I had to reboot the workstation to finalize the network fix I started this morning. I couldn't ping the workstation until I rebooted it, though I could ping from it to MLSO. Before the media converter fix I couldn't ping outward from the shelter so we still need a spare sent to us, Sang said he is working on getting us a spare media converter.
