MKIV PROBLEM:
Fri May 8 23:18:57 GMT 2009

Had lots of trouble getting past VXWorks startup to the GUI screen using the spare MV200 board though I've done it before. Will leave the old MV200 board in place for now. Lots of email traffic, between that and running the observations I didn't get a chance to try all the things I wanted with mk4, will continue Sunday.
