            Fri Feb 26 20:00:55 GMT 2010
Year: 10  Doy: 057
Observer: koon
**CHIP PROBLEM**: Fri Feb 26 21:37:04 GMT 2010
MCC wouldn't startup, red fail LEDs were on, GUI monitor wouldn't startup
correctly, could ping alakai OK.  MCC uses VxWorks to get startup commands
from Nene, so MCC wouldn't strtup since Nene was disconnected.  Fixed problem
by reconnecting Nene, later we'll move that startup file to Kii and change
the VxWorks startup code so it looks for that on Kii instead of Nene.

Fri Feb 26 21:44:43 GMT 2010     CHIP      Start Patrol
Fri Feb 26 21:47:47 GMT 2010     CHIP      End Patrol
**PSPT PROBLEM**: Sat Feb 27 00:40:24 GMT 2010
Crashed, restarted.
___end___
COMMENT: Sat Feb 27 00:40:41 GMT 2010
No observing with main spar today due to work on CoMP and CHIP, we may get some observations later today.
