Observer: koon

WEATHER COMMENT: Wed Apr 7 17:12:12 GMT 2010

Low clouds and fog upwind, wind=10mph from the SE, temp=40F.

\_\_\_\_end\_\_\_\_

NOTE BY DARRYL: Wed Apr 7 17:16:26 GMT 2010

No obs until this light fog clears.

\_\_\_\_end\_\_\_\_

WEATHER COMMENT: Wed Apr 7 18:30:27 GMT 2010

Still have lots of clouds though fog has gone away.

H-ALPHA COMMENT BY DARRYL: Wed Apr 7 18:31:02 GMT 2010

I checked the camera for loose connections, it looks good though I may have rotated the telescope a little about an axis that is normal to the spar face.

CHIP COMMENT BY DARRYL: Wed Apr 7 18:32:42 GMT 2010

Added a few more screws to the inner cover and put the outer cover back on.

H-ALPHA COMMENT BY DARRYL: Wed Apr 7 19:37:26 GMT 2010

Ben figured out a way to use the laptop to monitor the H-alpha images using Remote Network Connection, and he aligned the telescope. I gave it a try and did a few small tweaks that may have improved the bandpass and focus, we'll try more later when the clouds clear.

Wed Apr 7 19:41:44 GMT 2010 CHIP End Patrol

WEATHER COMMENT: Wed Apr 7 19:42:52 GMT 2010

Clouds are getting thick and dark, paused instruments and closed domes.

\_\_\_\_end\_\_\_\_

WEATHER COMMENT: Wed Apr 7 20:20:52 GMT 2010

Fog has moved in.
