\*\*CHIP PROBLEM COMMENT BY DARRYL\*\*: Sun Aug 1 17:38:19 GMT 2010

Once again CHIP has crashed with Program:Exposures and Optics:Busy, I'm going to try rebooting Kii this time.

\*\*GONG PROBLEM COMMENT BY DARRYL\*\*: Sun Aug 1 17:42:09 GMT 2010

Got automated messages about "the temperature is high" and "error condition 2"

at home and at MLSO all night. The AC units were accidentally left off by the visiting PM crew, I notified them last night and turned AC units back on

this morning, the inside temperature was 80F though they remotely shut off

the Data and Instrument and H-alpha and GONG2 computers last night.

\*\*H-ALPHA PROBLEM COMMENT BY DARRYL\*\*: Sun Aug 1 19:15:48 GMT 2010

The observing program doesn't work correctly as noted in yesterday's log.

I also tried rebooting the PC but that didn't help, it takes one limb image and stops using the run command, so I used the "run continuously" command and it repeatedly takes limb images w/o any disk images. I'm going to leave it like that for now while I work on other things.

PSPT COMMENT BY DARRYL: Sun Aug 1 20:06:15 GMT 2010

Pausing obs to check out filter for inventory.

\_\_\_end\_\_\_

NOTE BY DARRYL: Sun Aug 1 20:32:01 GMT 2010

Extended the dome slot.

\_\_\_end\_\_\_

PSPT COMMENT BY DARRYL: Sun Aug 1 20:32:15 GMT 2010

Found newly listed filter for inventory, it is now labeled for future reference and I added notes to the PSPT log book and command sheet and inventory key.

Will reinstall and start obs again soon.

CoMP COMMENT BY DARRYL: Mon Aug 2 01:20:12 GMT 2010

Put rest of LN2 in res, then filled dewar to just below inside neck, could hear obvious pitch change when filled that far. Empty dewar weighs 6.25 lb, full dewar weighs 15.75 lb. Topped off reservoir. I think we should fill dewar near end of day for now, to be sure the instrument can be filled and started in the morning without needing to fetch LN2. Then we'll fill the res in the morning and end of the day as we have been. Once trip per day with the dewar, and 2 fillups of the instrument reservoir each day.
