CHIP PROBLEM COMMENT BY DARRYL: Tue Sep 7 17:15:21 GMT 2010

GUI monitor didn't come up, tip window shows "connected", can't ping alakai, FAIL LEDs lit on 4105 and 3125 boards. Reset alakai, got same results except that the tip window shows that the startup script executed. Cycled the MCC cabinet power with same results, reset alakai again and GUI came up and I could ping alakai, started obs.

MKIV PROBLEM COMMENT BY DARRYL: Tue Sep 7 19:40:43 GMT 2010

Was getting "Data Xfer Failure - check nahenahe" messages in the akamai window, idled the scans and cycled the KCC main power, didn't work, doing a pau/run cycle next.

MKIV PROBLEM COMMENT BY DARRYL: Tue Sep 7 20:09:42 GMT 2010

I idled the scans then did a pau/run cycle then did and End Day (and maybe a Begin Day) before starting scans again. Data are being recorded again. May not have needed to do the End Day and Begin Day steps. For some reason the partial log got automatically emailed after the "pau" command.
