**CHIP PROBLEM COMMENT BY DARRYL**: Fri Oct 1 17:36:58 GMT 2010
Crashed w/o taking any images at WaitOptics, fixed by doing "pau" then
Cancelling tasks then cycling main MCC power leaving it off until the green
Vout LED goes dark ( I had to do this twice but it seems faster than just
pressing the Reset button on Alakai), than did a "run".
WEATHER COMMENT: Fri Oct 1 18:32:37 GMT 2010
Low clouds are moving in, and haze/vog is rising up and making the sky bright.
end

WEATHER COMMENT: Fri Oct 1 19:20:57 GMT 2010
Thick clouds have moved over, fog is approaching, pausing instruments
and closing domes.
