H-ALPHA COMMENT BY DARRYL: Wed Dec 1 20:08:59 GMT 2010

I moved the PC to be above the Nene Sparc, this frees up room in the lower cabinet for the HawTel network upgrade equipment.

WEATHER COMMENT: Wed Dec 1 23:00:36 GMT 2010

Still have clouds too thick for spar to track.

NOTE BY DARRYL: Wed Dec 1 23:00:58 GMT 2010

All day I've been working on preparing a place for the the "in-MLSO" HawTel equipment needed for the network upgrade. Today Mac and Oly from HawTel came up and installed almost all the equipment, they need to come back, possibly with Norman for the "turn up" after the installation, or possibly before to install a few more cards in the equipment and install at least one cable that will go to the panel on the inside of the North wall that the Cable/conduit crew will install next. Also another "Splicing" crew will need to come up during the installation process. Note that Norman will be here with Lance and us for the "turn up".

GONG COMMENT BY DARRYL: Thu Dec 2 00:22:10 GMT 2010

I went to shelter and swapped the Halfwave Amp, waveplate card, and Drive ISO card. I left SN info entered as a comment at the shelter workstation, restarted obs and it is OK. This was requested by Bert.
