\*\*GENERAL PROBLEM COMMENT BY BEN\*\*: Fri Dec 24 19:23:52 GMT 2010

When I got in this morning the UPS that runs the SUN's was beeping, and had an error message about having an inbalanced DC load. In trouble shooting the message I was able to fix it by power cycling the UPS. Unfortunately this brought down all the suns

it a very long time to get all of the systems back up with the proper cross mounts.

NOTE BY BEN: Fri Dec 24 19:29:31 GMT 2010

Observing with Chip,halpha, and pspt but the cirrus is a little to thick to get good data.
