NOTE BY DARRYL: Tue Feb 22 21:14:49 GMT 2011

HVO is now on the new network, that's it, everyone has been moved onto the new network, I'll turn off the old router and let people know that

we want to cancel the old network connection with HawTel and UH. Yeehaw!

We're still using the old switch as a temporary 10/100 Mbps media converter for GONG via their old fiber optic cable, that will be changed in the near future when GONG sends us either patch cables for the new shelter media converters or a new shelter network switch that is Gigabit ready and outputs fiber optic cables via SFP connectors.

____end____

WEATHER COMMENT: Tue Feb 22 21:16:31 GMT 2011

Still very cloudy.
