CHIP COMMENT BY DARRYL: Tue Apr 12 20:57:36 GMT 2011

Pausing to work on image artifact problem. Will be off-pointing the spar often

\_\_\_\_end\_\_\_\_

MKIV COMMENT BY DARRYL: Tue Apr 12 20:58:30 GMT 2011

Pausing while working on CHIP artifact problem, due to frequent spar pointing changes during the work.

\_\_\_\_end\_\_\_\_

H-ALPHA COMMENT BY DARRYL: Tue Apr 12 20:59:59 GMT 2011

Pausing while working on CHIP.

\_\_\_\_end\_\_\_\_

\*\*CHIP PROBLEM COMMENT BY DARRYL\*\*: Wed Apr 13 01:38:10 GMT 2011

It looks like I fixed the artifact problem. There was oil on the exit window of the Lyot filter and on the back face, I removed the Lyot filter and cleaned both windows and re-installed, am running Patrol now and I don't see any artifacts, it is partly cloudy so I'm not absolutely sure, also the filter is still coming up to operating temperature so the images are still off-band.

I centered the Lyot filter in its mount and improved some insulation fitting and I added tape at the front of the instrument where stray light could get it around the pre-filter mount. I blocked space travel with orange stairs and turned off MCC before disconnecting and removing the Lyot filter. That's the main pertinent information. I'm not sure if the Lyot filter will leak more oil, let's try it and see if anything changes over time.
