MKIV PROBLEM COMMENT BY DARRYL: Mon Jan 9 00:54:45 GMT 2012

I put dabs of hot glue over the e-clips that hold on the rollers at the back end, the rollers that fall off from time to time, hopefully this will keep them better. The cable shroud that contacts the rollers was loose, I replaced 3 missing metric M3 screws and put split lock washers on all screws, now the shroud is tight and should remain that way, it might have caused the rollers to put too much stress on the e-clips when it was not tight.
