**CHIP PROBLEM COMMENT BY ALLEN**: Sat Jan 14 20:50:06 GMT 2012
Kii crashed with Watchdog Reset during Accumulate. Not restarting observation
so I can investigate possible Kii memory problems.

WEATHER COMMENT: Sun Jan 15 00:10:58 GMT 2012
In clouds, instruments idled.
___end___
**CHIP PROBLEM COMMENT BY ALLEN**: Sun Jan 15 00:35:11 GMT 2012
I have been testing kii memory today. Using the "test /memory" command >ok
prompt I get errors in about 32 contiguous locations below adress 441ff8
```

associated with Jo201, BUT the errors are only found the first time I run the
command after a reboot. I then removed the two memory modules, cleaned the
contacts and reinstalled them in reversed locations. The errors are the same
and still for J0201 and only the first test after a reboot.
