**CHIP PROBLEM COMMENT BY DARRYL**: Sun Jan 15 23:09:52 GMT 2012
Crashed, first error messages on bootup monitor were:
panic: memory error
syncing file systems...
nc-- giving up
rebooting...

and later:
/dev/rdsk/c0t3d0s7 and /dev/rdsk/c0t3d0s4 gave error messages while
trying to reboot, it says to run fsck manually due to unexpected inconsistency
in /dev/rdsk/c0t3d0s4 (/local/d)
so I ran fsck on it (answering "y" to all questions) and restarted.
___end___
**CHIP PROBLEM COMMENT BY DARRYL**: Sun Jan 15 23:34:22 GMT 2012
After crash the Status window showed Crunch: 1, Accumulate: Idle, and Disk:Idle,
and the Console window didn't show any error messages.
```

```
___end___
WEATHER COMMENT: Sun Jan 15 23:36:57 GMT 2012
Low and high clouds have moved in, stopped instruments.
