\*\*MKIV PROBLEM COMMENT BY DARRYL\*\*:  
Tue Jan 17 18:51:39 GMT 2012

Can't get GUI window to come up, decided to start log anyway to write these comments. This was a problem that happened last week that was fixed by my reseating the Vigra video board, the problem started happening again yesterday. I tried reseating the Vigra board and saw that it must have been reseated again since I did it last week because all the hold-down screws were loose, but no mention in the logs of anyone doing this, anyway I reseated it again but still haven't got the GUI screen to come up yet.

\*\*MKIV PROBLEM COMMENT BY DARRYL\*\*:  
Tue Jan 17 19:14:37 GMT 2012

Something interesting happened when I did a "run" command to start the log earlier, suddenly the akamai window appeared, I think that should have been up before doing the run command, after that I cycled the main KCC power and got the regular GUI back, all looks normal again.

WEATHER COMMENT: Tue Jan 17 19:26:21 GMT 2012

Clouds have thinned enough to track and run non-coronal instruments.

\*\*CHIP PROBLEM COMMENT BY DARRYL\*\*:  
Tue Jan 17 21:15:19 GMT 2012

Crashed around 2032 UT, Program: FixCenter, Optics: Busy on Status window; /data/chip/2012\_01\_17\_20\_32\_23.rsr on Console window. No obvious error messages. Crashed to OK> prompt. I rebooted.
