CHIP PROBLEM COMMENT BY DARRYL: Tue Apr 10 18:20:17 GMT 2012

Trouble starting this up. Couldn't login, it wouldn't recognize my account for some reason and had messages from last night about what looked to be a failure during a disk access. I synced Kii and tried to restart but got endless messages about not being able to make a connection, and the Fail LEDs remained lit on the 2533 and 4105 VMI/VME boards in Alakai. Turned off MCC and then Kii, waited a few minutes before turning Kii back on, then waited about 20 minutes more before turning MCC back on, that fixed the problems. Observing now.

GONG PROBLEM COMMENT BY DARRYL: Tue Apr 10 18:40:56 GMT 2012

Turret oscillating, stopping and restarting guider from gongExpert control window didn't fix it right away, I tried many times with waits from an instant to 20 seconds, it finally worked and the turret stabilized, the last stop/start cycle wait was only an instant, click off then on right away, but that might be unrelated to the turret stabilizing.

Put the movie temporal resolution back to every image so we catch problems better, this also let's us see activity better.
