*****EVENT COMMENT BY BEN*****: Sun Jul 8 17:22:19 GMT 2012

Looks like the flaring is associated with a large over abundance with MK4. So far I cant tell if it is moving.

****CME COMMENT ****Sun Jul 8 17:27:08 GMT 2012

Looks like there might be a CME launching from the WEST limb. For at least the last hour there has been a lot of prominence activity, and we see an over abundance in the k-corona with MK4.

PSPT PROBLEM COMMENT BY BEN: Sun Jul 8 18:00:36 GMT 2012

One of the PSPT images, was divided into a north and south hemisphere with a gap about 1/4 the diameter of the sun between the two halves. The next image was back to normal.
