COMP PROBLEM COMMENT BY ALLEN: Sat Jul 21 19:50:05 GMT 2012

Comp is running again. The E/W occulter controller had a hard error. The comp gui didn't show any problems, it would simply hang up in any routine that tried

to move the occulter. Resetting the error required holding in the manual E/W

control on the back of comp for 5 seconds, which resets and homes the controller. The controller has a status led which is supposed to show red for an error but

it looks almost identical to "yellow" (which looks deep red/orange) unless you look at it from just the right angle.
