NOTE BY BEN: Thu Sep 27 19:07:36 GMT 2012

We are recovered from the power outage.

Kii lost 10 hours on the clock; date was reset. It also failed to mount /data on startup. Manually mounted after boot.

Oopu and Kenobi were at startup screen asking for control+d to start or root password for maintance. After booting oopu failed to mount /work due to disk errors; fsck seemed to fix this.

Nahenahe failed to connect to akamai on startup; when trying to take data the console got a error connecting to a device while trying to run ReadKcc->bt\_kccint this was fixed with a reboot of nahenahe.
