WEATHER COMMENT: Mon Nov 12 17:11:33 GMT 2012

clear skies, temp 36f, wind 10mph from sw, road was icy below 10,000ft

end

MKIV COMMENT BY BEN: Mon Nov 12 17:12:13 GMT 2012

O1 guider like it lost it's N-S offset, but analog signal still looks funky

CoMP camera off. Allen is on PTO tomorrow

end

MKIV COMMENT BY BEN: Tue Nov 13 00:56:46 GMT 2012

Mk4 remains down. It still look like there is no/low light making it to the detector. And the O1 guider is still claims a farily large (5) south error signal.

Today I looked at the O1 it seems well seated and looks ok..

I also looked at guider plate, occulter station and field lens. Wednesday I will try to understand the O1 guider detector circut a little better perhaps the problem comes from one of these detectors.
