WEATHER COMMENT: Thu Nov 15 17:22:50 GMT 2012

temp 43f, wind 15mph from se, patchy cirrus covering the sky.

____end____

MKIV COMMENT BY BEN: Thu Nov 15 17:23:12 GMT 2012

With the cirrus layer up there the mk4 analog looks correct. Both of the doule humps are seeing the expected washed out 1 imb signal.

MKIV COMMENT BY BEN: Fri Nov 16 01:05:38 GMT 2012

Looking at the CoMP occulor postion over time I dont see anything special when mk4 failed so it looks like the spar guide r ins't at fault for misalignment of Mk4.

I investiaged possible realignment options for MK4 today but the the cirrus never cleared up enough to give it a try.
