MKIV COMMENT BY BEN: Thu Dec 13 00:26:44 GMT 2012

Height mask secured to prevent rotation. Due to the way the fuducial is defined for the mas it was possible for it to rotate a degree or 2 w.r.t the occulting disk during barrel rotation. I added a little tape to prevent the mask rotation and I am taking

a new set of calibrations. Right now where is a very light hazy, not enough to see structure by eye but it doesnt look coronal.

end

Thu Dec 13 00:42:06 GMT 2012 MKIV End Cal  
Thu Dec 13 00:54:11 GMT 2012 MKIV Start Patrol

MKIV COMMENT BY BEN: Thu Dec 13 00:54:18 GMT 2012

Height mask is out. However I think we left it near a focus to long. It appears to have a lot of thermal damage to the plastic that makes up the mask.

end

MKIV COMMENT BY BEN: Thu Dec 13 00:55:46 GMT 2012

Started mask out scan with opal in. Ladder part of the scan shows a lot of clouds.

end

Thu Dec 13 01:00:30 GMT 2012 MKIV End Patrol  
Thu Dec 13 01:31:09 GMT 2012 CHIP End Patrol

Thu Dec 13 01:31:31 GMT 2012: PSPT Abort Patrol

NOTE BY BEN: Thu Dec 13 01:42:43 GMT 2012

SHABAR moved about 1" toward the center of the spar. This should help eliminate a problem where we dome vingetting on one of the 6 photo diodes in the early morning.

end

Thu Dec 13 01:44:00 GMT 2012
