MKIV PROBLEM COMMENT BY BEN:
Fri May 31 16:57:18 GMT 2013

Mk4 crashed in a weird way, the barrel rotated about 10 degrees at the start of a patrol and then just stopped. I am not sure what happened no indication of a problem on the alakai console or monitor
Rebooting alakai seemed to fix the problem.

****EVENT COMMENT BY BEN****: Fri May 31 23:55:28 GMT 2013
Fast EPL launched around 22UT near PA240
__end__

NOTE BY BEN: Sat Jun 1 00:11:10 GMT 2013
Mk4 images look funky since 23:27UT. Realtime digital and analog displays look ok but the quick look gifs are just a gradient of arcs across top from ~PA80 to PA 270

PSPT PROBLEM COMMENT BY BEN : Sat Jun 1 04:06:23 GMT 2013

I couldn't park pspt at the end of the day today. It looked like part of the problem was I waited until too late and the camera timer ran out. However when the camera control box was plugged into wall power it still wouldn't turn on.

I think there is a chance the control box is having a problem. It also could be an interaction between Pspt control compu

ters and control box due to some late in the day issue.

To park the mount, I unclutched RA and Dec and moved the tube by hand. Hopefully everything just works tomorrow morning.
