KCOR COMMENT BY berkey: Fri Oct 4 18:03:19 GMT 2013

Yesterday Allen was unable to run the the calibrations. The script crashed when trying to move the polarizer. This is due to a failure to autocommunicate with the new "leave socketcam running" version of the socket cam code.

end

KCOR COMMENT BY berkey: Fri Oct 4 18:39:32 GMT 2013

Changed exposure from 0.10 msec to 0.125 msec. 18:36:35 is first image with 0.125 msec exposure (j.burkepile)

Change fits Bzero from 2^15 to 2^31 18:19:03 is first image with new (Correct) BZERO value (j. burkepile)

KCOR COMMENT BY berkey: Fri Oct 4 21:26:49 GMT 2013

In the second calibration started at 20:14 the CALPANG failed to update for 112.5 and 157.5. However in both cases the image intensities reflect an actually change in pol angle

KCOR COMMENT BY berkey: Fri Oct 4 23:16:36 GMT 2013  
Just noticed I forgot to hit science after the last kcor calibrate. Data between then and now looked pretty good and shou ld be "science" quality.
