WEATHER COMMENT: waters: Sat Mar 29 16:45:17 GMT 2014
Temp 36F with windspeed at 3mph from the South. Complete overcast towards the Eastern horizon, with patches revealing circus. Vog is above 12,000ft and a fog bank at about 10,000ft in the East as well. Little bit of drizzle now and then; will wait for better weather before opening the domes.  end
GENERAL OBSERVATORY COMMENT BY waters: Sat Mar 29 16:55:55 GMT 2014  Fog bank has rolled in. end
GENERAL OBSERVATORY COMMENT BY berkey: Sat Mar 29 20:05:58 GMT 2014  This morning I was able to get a shabar.exe to run on the windows 7 laptop after removing all of the national instruments softare I installed yesterday and installing DAQmx9.2 fresh. The shabar.exe was built on kcor and I saved the project of le on the kcor machine to c:\shabar. This is not a perfect solution since we cannot debug/look at the shabar code while cor is observing; but the shabar codebase has been fairly stable for at least a year so this shouldnt be to much of an issue.
On monday I will try to find a reasonble way to commit what I did to svn, although there isn't much to contribute as the rain thing I changed was building a new project file.  With the executable built on kcor, and the winxp shabar laptop offline we are now only using 3 labview liscense at Mauna I oa instead of the 4 we were using yesterday.
If/when it clears up this weekend we need to do some more testing to see how shabar talks to the usb-6211 when it sees a signal. For now Thanks for all the help Lisa.
end end
GENERAL OBSERVATORY COMMENT BY waters: Sat Mar 29 20:10:10 GMT 2014
Seems like Ben has Shabar back online. Only waiting for better weather to varify that it is indeed working. Just a note, w
hen you hit stop, the gride that normally appears when it is stopped isn't there anymore. Just make sure the run button is white. Thank you Ben!!end
GENERAL OBSERVATORY COMMENT BY waters: Sat Mar 29 20:58:41 GMT 2014 Raining now end
GENERAL OBSERVATORY COMMENT BY waters: Sun Mar 30 01:33:20 GMT 2014
Currently snowing and it's sticking pretty well, heading down nowend
