**CoMP PROBLEM COMMENT BY stueben **: Thu Apr 24 23:01:03 GMT 2014

The new comp PC crashed and I can't get it to reboot. It appears as if the hard drive has failed.

**CoMP PROBLEM COMMENT BY stueben **: Thu Apr 24 23:51:00 GMT 2014

I pulled off the PC cover and noticed the power cable to the hard drive was slightly askew. After reseating the power connector the PC booted normally and all seems OK.
