PSPT PROBLEM COMMENT BY berkey : Wed Jun 4 16:17:04 GMT 2014

Pspt xterm as a lot of messages related to NSF server no responding and then later being ok. I also get a "No more processes." error when I try to run something. I think this means we are out of virtual memory on the system. Logging out of open windows seems to have cleared up the issue for now..

GENERAL OBSERVATORY COMMENT BY berkey: Wed Jun 4 18:03:14 GMT 2014

main UPS just shut down its load side for about 15 seconds. Many systems were effected, network equipment, sgs, ulua, iwi all shut down. It is not clear why this hiccup occurred.

GENERAL OBSERVATORY COMMENT BY berkey: Thu Jun 5 01:29:17 GMT 2014

Big cryo dewar is empty, but we had enough Ln2 to fill comp. We are scheduled for Ln2 delivery today so everything seems to be working out.

GENERAL OBSERVATORY COMMENT BY berkey: Thu Jun 5 01:29:58 GMT 2014

Removed the default gateway tcp/ip config for the printer, hopefully this will stop it from printing random junk from the internet.
