\*\*GONG PROBLEM COMMENT BY stueben\*\* : Thu Jun 26 22:27:13 GMT 2014

The Data computer has failed. I have been working with gongops to try to get it running again.

\*\*PSPT PROBLEM COMMENT BY stueben\*\* : Thu Jun 26 22:29:10 GMT 2014

I have not been able to get pspt started today. It hangs up fairly early in the startup sequence at "Take 3 dark frames ...". Alice has been helping. There are no obvious problems - all units have power and cables and connectors look OK.

GENERAL OBSERVATORY COMMENT BY stueben: Thu Jun 26 22:41:14 GMT 2014

Adam and Irfan arrived at MLSO and looked at MLSO and the surrounding area as part of determining its suitability for the TIDDBIT receiver system.

\*\*KCOR PROBLEM COMMENT BY stueben \*\*: Fri Jun 27 02:09:12 GMT 2014

The kcor UPS shut down for no apparent reason. Its front panel showed no ac line in but measuring the voltage on the line it read OK. I turned it off, unplugged it it then turned it back on. Now the powerline showed good and it started up and charged its batteries. Restarted the computer and it seems OK. Strange!

\*\*GONG PROBLEM COMMENT BY stueben\*\* : Fri Jun 27 02:30:18 GMT 2014

After trying many board swaps and gongops installing some software workarounds gong is once again running.
