GENERAL OBSERVATORY COMMENT BY waters: Sun Aug 10 18:34:15 GMT 2014

Yeah! After consulting with Allen, I was able to figure out why I was having trouble powering Kcor. There are two power controllers in the Nema boxes that needed to be powered on. They're a bit hard to see since they are vertical and in the back of the box. Heading down to work on GONG while temperatures come up on the instruments up here.

GONG COMMENT BY waters: Sun Aug 10 19:44:16 GMT 2014

After consulting with both Allen and Bert, I was able to get GONG up and running again. The window had some droplets on it which I gently cleaned and I dried the turret cover and it is back in the shed.

GENERAL OBSERVATORY COMMENT BY waters: Sun Aug 10 20:51:44 GMT 2014

The clouds look ominous, very dark with a chilly wind behind them. Closed the domes just in case.

GENERAL OBSERVATORY COMMENT BY waters: Mon Aug 11 01:38:04 GMT 2014

In an effort to trouble shoot the internet problem, I reset the modem to no avail. It shows up as linksym. I reviewed some emails/logs to see if there is a way to trouble shoot the server. Couldn't
Besides rebooting it, I couldn't find much. Hopefully tomorrow we can figure it out. Thank you Joan, Ben, Allen, and Bert for your help today!

COMP COMMENT BY waters: Mon Aug 11 01:53:39 GMT 2014

Restarting it revealed that when I switch the monitor to it and try to use the keyboard or mouse it won't work. When going

to the switchserver duo usb screen to switch and I hit comp, it says at the top computer off
I looked at port 3 and it looks like everything is connected. I'm not to sure where to look for this one. One of the servs
witch has a red light but I'm not sure what it does. I'll leave this to someone who knows what they're doing. Sorry.
