Year: 14 Doy: 357

Observer: stueben

WEATHER COMMENT: stueben: Tue Dec 23 17:37:49 GMT 2014

Dense overcast, light western breeze, temp 33F. Slushy snow on the road above 10,000 ft, couldn't drive up past the gate, parked below the gate and walked up. Light snow falling at present with more snow/rain forecast for the rest of the day. I will go back down the mountain after filling comp LN2, covering the gong turret and having a cup of tea.
