KCOR COMMENT BY berkey: Fri Jan 9 18:01:21 GMT 2015

Alice updated socketcam last night/early this morning.

____end____

KCOR COMMENT BY berkey: Fri Jan 9 18:03:06 GMT 2015

Getting a lot of SPii errors morning attempting a reboot.

____end____

KCOR COMMENT BY berkey: Fri Jan 9 18:09:12 GMT 2015

Getting circular acquisition errors on socketcam startup.

____end____

KCOR COMMENT BY berkey: Fri Jan 9 18:10:51 GMT 2015

Restarting the labivew observing program let socketcam start properly this time.

____end____

Fri Jan 09 18:14:45 GMT 2015 KCOR Start Synoptic Patrol

KCOR COMMENT BY berkey: Fri Jan 9 18:11:53 GMT 2015

Lots of lagging in socketcam. Communication with acsmotion suggests that the SPii plus failures we are seeing typically happen when the client application "hammers" the SPii with too many requests. Or the computer is overtaxed by some process with memory leaks or other problems. Perhaps the lagging and SPI crashes are related and caused by malware or something.

____end____

PSPT COMMENT BY berkey: Fri Jan 9 19:39:15 GMT 2015

Installed the pspt motor. But there appears to be a wiring issue in need of more troubleshooting since I can't seem to move it left.

____end____

KCOR COMMENT BY berkey: Fri Jan 9 19:40:17 GMT 2015

Stopping the SuperFetch services fixed a lot of the lagging. Since stopping SuperFetch the biggest lag value I have seen is 70

PSPT COMMENT BY berkey: Sat Jan 10 01:28:01 GMT 2015

I think I miss-wired the pspt motor. Dome rotated but there was some smoke from the produrding module (I tihnk there is a startup capictor under it), and some sort of liquid (dielectric from the cap?) came out. I hope I didn't ruin a second motor; hopefully Allen will know how to get this sorted out.

____end____

GENERAL OBSERVATORY COMMENT BY berkey: Sat Jan 10 01:31:48 GMT 2015

Clouds came in so pausing instruments.

____end____

KCOR COMMENT BY berkey: Sat Jan 10 02:41:38 GMT 2015

With superfetch off (and now disabled) the spii crashes seemed to go away and teh frame lagging was resonable 0-50ish.

:)

____end____

KCOR COMMENT BY berkey: Sat Jan 10 02:42:22 GMT 2015

Optics box was opened again this afternoon to get a couple more measuremnts for the IG. These measuremnts will drive the new camera mounts to be installed later this year.
