GONG COMMENT BY stueben: Tue May 19 21:35:44 GMT 2015

I have spent the last couple of hours at the gong shelter performing a Cal  
Wheel 1 servo driver dc offset adjustment at the request of gong ops.

\*\*PSPT PROBLEM COMMENT BY stueben\*\* : Wed May 20 01:54:06 GMT 2015

Pspt is still down. I looked at the J64 connections and found one pin not locked  
into the connector shell, spread the lock tabs and reinserted the pin so it is  
now locked in place. This did not fix the problem. The CCD\_\_Trig connection, which would be most likely to cause the probl  
em looks solid.
