GENERAL COMMENT BY berkey: Fri Oct 09 17:07:45 GMT 2015

mlsoserver didn't fully reboot last night. Got caught with a fsck error, rebooting now hopefully it doesn't take 8 hours to update.

GENERAL COMMENT BY berkey: Sat Oct 10 01:39:35 GMT 2015

Control room and dome cleaned out.

Everything on Comp forward of the optics box has been removed from the spar. The O1 housing, fore-optics cover and occulting station.

It's been a day.

GENERAL COMMENT BY berkey: Sat Oct 10 01:42:57 GMT 2015

Mlsoserver never came up properly. We did complete a disk check with manual fsck however on reboot it did its normal end its been a few months check and has not completed. About 1/2 way though we shut it down to move the rack and complete the clean out of the control room.

In the racks new position we powered the server back up and it is doing the test again. I will shut it down and do the final close out of the rack Monday morning.

Network equipment is online to continue providing data service to gong.
