GENERAL COMMENT BY stueben: Sun Jan 03 02:28:29 GMT 2016

Some early morning haze and afternoon sky noise, but generally a nice day. The spar did lose tracing once in the afternoon, though the spar cables are not tight I think they may be exerting some force on the spar in the afternoon. The extreme spar dec angle at this time of year tends to cause spar tracking issues we don't see at other times of the year.
